Taabinga State School established in 1897 provides a quality co-educational program for children in Prep to Year 7. We recognise and foster every child's unique talents in modern facilities surrounded by beautiful gardens.

Our curriculum is designed to prepare our students for the yet unknown challenges they will face in this Century, promoting student's abilities to think, investigate, create, communicate, participate and reflect so that they are equipped and motivated to meet these challenges.

At Taabinga State we use technology as an integral part of our teaching and learning program. Every unit of work includes a technology focus and support staff are available to assist students and teachers as they improve their skills in this important area. At the same time we are committed to ensuring that students develop their full potential in the areas of literacy and numeracy, setting targets for performance in these areas every year.

Our students and their families are extremely important to us. Our service to you is the provision of a high quality primary education. As such we will always respond to issues in a way that is educationally sound and clearly values students and their families.
